### Biology, Biology Professions Track, B.A.

The B.A. degree in Biology provides the same comprehensive core, research experience and capstone as the B.S. degree, but its two tracks are tailored to be compatible with a second major (Biology Professions track) or with the requirements of professional schools in such allied health areas as nursing, physical therapy, physician assistant, occupational therapy, pharmacy, or optometry (Health Professions track). Students choosing the Biology Professions track need an additional major in a complementary area such as environmental studies, neuroscience, physics, mathematics, computer science, business, etc. Students preparing for secondary education should complete the B. S. Biology Education track. Students planning to continue to graduate programs in the biological sciences or to medical, dental, or veterinary programs should consider the Biological Sciences or Biomedical Science tracks for a B.S. degree in Biology.
