

## 2019 Summer School Courses

Title and Number	Description	Location	Schedule	Credit Hours
ART*135*1 (48800) Watercolor Painting	An introduction to watercolor painting through exploration of materials, techniques and history. Enhancement of the student's abilities to make personal visual statement.	Meiley-Swallow Hall, Room 203	06/11/2019-08/01/2019 Tuesday, Thursday 05:30PM - 07:45PM	3
ART*150*1 (48799) Ceramics I	An introduction to clay which places an emphasis on handbuilding techniques with some sculpture, wheel throwing, glaze application and kiln experience. This course also addresses issues of three-dimensional design as they pertain to contemporary ceramics.	Meiley-Swallow Hall, Room 16	06/10/2019-07/31/2019 Monday, Wednesday 05:30PM - 07:45PM	3
ART*205*BL71 (48801) Digital Photography	An introduction to the basic tools and programs used in the electronic imaging process of digital photography. Students develop their imagery and concepts through the use of computers and software. Areas of concentration include imagery manipulation, color and collage. Digital camera is required.	Meiley-Swallow Hall, Room 110	06/11/2019-07/04/2019 Tuesday, Thursday 09:00AM - 11:15AM	3
COM*100*BL1 (48785) Introduction Public Speaking	An introduction to a wide array of public speaking skills, including preparation, presentation and evaluation of speeches. Recommended primarily for first year students and sophomores.	Goldspohn Hall, Room 34	06/10/2019-07/31/2019 Monday, Wednesday 09:00AM - 11:15AM	3
COM*230*OL1 (48787) Business & Professional Communication	This course focuses on developing the skills and strategies involved in written, face-to-face and electronic communication in professional settings. Students learn fundamentals of interviewing, writing and presenting in professional contexts and may investigate organizational communication practices such as performance feedback, training, meeting management and organizational identity.	Online	06/10/2019-08/02/2019 Online Days to be Announced	3
COM*317*1 (48786) Intercultural Communication	A study of the basic components involved in intercultural communication. Topics considered include, but are not limited to: cultural biases, cultural determinants of experiences and backgrounds, social perception, verbal interaction, nonverbal interaction and opinion leadership.	Goldspohn Hall, Room 34	06/13/2019-08/01/2019 Thursday 06:00PM - 10:15PM	3

CSC*140*1 (48789) Fund of Computational Problem Solving	An introduction to computing focusing on problem solving, algorithm construction, data organization and program development using Python. Topics include basic programming fundamentals and constructs such as variables and assignment statements; arithmetic, relational and logical operators; decisions and loops; modularization with functions; files; and data structures such as lists and dictionaries. Prior programming experience is not required. This course does not count toward a major in computer science, but may apply to a minor. May not be taken after successful completion of any higher level computer science course.	Wentz Science Center, Room 154	06/11/2019-08/01/2019 Tuesday, Thursday 06:00PM - 08:20PM,	3
EDN*101F*1 (50401) Teaching Today Field Experience	Examination of the structures that frame the work of teaching and learning in schools. Emphasis on the impact of curricular learning standards on teaching, learning and decision making. An overview of the profession, the Danielson Framework for Teaching, the Illinois Professional Teaching Standards, Common Core Standards and the expectations of the North Central College Teacher Education Program will be introduced in this gateway course. Required: 15 field experience hours must be completed at North Central College.	Rooms to be Announced	06/10/2019-08/02/2019 Clinical Experience Days to be Announced, Times to be Announced	3
EDN*411*71 (48790) Teacher Leadership in Learning Environment	The purpose of this course is to encourage students to carefully analyze their responsibilities and commitments in the context to leadership for the common good and for purposeful change in our schools. The focal point to explore leadership will center on the issue of equity. The course includes the study of leadership with a focus on relational leadership and teacher leadership as well as the application of leadership theories, concepts and skills in school settings to support equity. Students will also develop their own leadership potential through the completion of personal and leadership self-assessments, values exploration and leadership skill applications through course activities.	Benedetti-Wehrli Stadium, Room 229	06/10/2019-07/05/2019 Monday, Tuesday, Wednesday, Thursday, Friday 09:00AM - 11:00AM	3
ENG*315*OL1 (48797) Advanced Writing	Extends skills introduced in ENG 115, IDS 125 and the General Education experience. Drawing on interdisciplinary readings and practicing cross-disciplinary writing and revision, students examine both their specific area of study and the larger academic and non-academic communities around them. Using inquiry and dialogue, students focus on the value of writing with others from a variety of fields in order to address complex problems in the public sphere.	Online	06/10/2019-08/02/2019 Times to be Announced	3
ENG*315*OL2 (48798) Advanced Writing	Extends skills introduced in ENG 115, IDS 125 and the General Education experience. Drawing on interdisciplinary readings and practicing cross-disciplinary writing and revision, students examine both their specific area of study and the larger academic and non-academic communities around them. Using inquiry and dialogue, students focus on the value of writing with others from a variety of fields in order to address complex problems in the public sphere.	Online	06/10/2019-08/02/2019 Times to be Announced	3

KIN*147*BL71 (48788) First Aid	Proper techniques and methods employed through the immediate and temporary care given to an injured person.	Benedetti-Wehrli Stadium, Room 232	06/13/2019-06/27/2019 Thursday 09:00AM - 01:00PM	2
KIN*156*OL1 (48808) Medical Terminology	Basic medical language skills are introduced. Required competencies to increase the student's abilities to examine medical literature and to communicate with health care professionals are developed.	Online	06/10/2019-08/02/2019 Times to be Announced	2
KIN*498*OL1 (48810) Exercise Science Internship Seminar	Provides students the opportunity to reflect and engage more completely in the internship experience. Course includes weekly reflections of the internship experience, group discussions of discipline related topics and a culminating project.	Online	06/10/2019-08/02/2019 Online Days to be Announced, Times to be Announced	1
MCL*390*OL81 (48802) Topics in Language and Culture	Intensive study of an interdisciplinary topic with special focus on culture and the role of linguistic and/or lexical diversity. Content varies from course to course.	Online	07/08/2019-08/02/2019 Online Days to be Announced, Times to be Announced	3
MED*200*OL1 (48784) Digital Writing	Digital writing introduces students to writing on different types of platforms including the web, applications and social media. Students learn to write for a variety of different topics including blog writing, online news and public relations. The course also hones writing and research skills for digital writing.	Online	06/10/2019-08/02/2019 Online Days to be Announced, Times to be Announced	3
MTH*118*1 (48782) Finite Mathematics	An introduction to mathematical and critical thinking skills with applications. Topics include symbolic logic, set theory, elementary combinatorics, probability and statistics, mathematics of finance, applications of linear functions and equations, and may include applications of matrices.	Wentz Science Center, Room 354	06/11/2019-08/01/2019 Tuesday, Thursday 01:00PM - 03:20PM	3
MTH*151*1 (48783) Calculus I	Fundamental concepts of calculus including limits, continuity and differentiation with applications. The Calculus I, II and III sequence is recommended for students in science as well as for students in other divisions desiring a strong preparation in mathematics. Students may not receive credit for MTH 151 and any of the following: MTH 130, MTH 140 or MTH 141.	Wentz Science Center, Room 356	06/11/2019-08/01/2019 Tuesday, Thursday 01:00PM - 03:20PM	3
PSY*250*OL1 (50224) Statistics	A course stressing the methods, concepts and logic underlying the statistical evaluation of research data. The course stresses descriptive and inferential statistics, estimation and hypothesis testing and "why" as well as "when" to use various statistical methods. A working knowledge of basic algebraic techniques is necessary. Only one of PSY 250 and BUS 241/ECN 241 may be taken for credit.	Online	06/10/2019-08/02/2019 Online Days to be Announced, Times to be Announced	3

PSY*293*BL1 (48811) Careers in Psychology	This course focuses on exploring various career options in psychology and related fields. The course will cover the different professional options available in psychology and how to successfully prepare for one's chosen future career. By collaborating with other students, instructors and resource people both inside and outside of the North Central Community, students will learn about a wide range of careers possible with a major in psychology.	Wentz Science Center, Room 256	06/10/2019-07/29/2019 Monday 05:30PM - 06:30PM	1
PSY*310*BL1 (48812) Cultural Psychology	(Same as: SOA 310.) The course considers what we mean by culture, and how taking culture into account affects our knowledge of basic psychology in areas such as human development, the self-concept, gender expectations, as well as our understanding of mental illness. The course focuses on both psychological and anthropological approaches to studying culture and the pros and cons of different approaches.	Wentz Science Center, Room 256	06/11/2019-07/30/2019 Tuesday 05:30PM - 07:30PM	3
SGB*191*71 (50258) Literature of the Modern World	This course introduces students to literacy treatments of enduring human issues from the period of the last 700 years. In this special section of the course, we emphasize the theme of intercultural encounters, stories of meetings between people with radically different ways of seeing and acting in the world. We will read in a number of different genres, including personal journals, short stories, a novel and a drama. We will also read historical works and literary criticism in order to appreciate the variety of ways such stories can be told and to what ends.	Goldspohn Hall, Room 22	06/10/2019-07/05/2019 Monday, Wednesday, Friday 10:00AM - 12:00PM	N/A
SOA*310*BL1 (48827) Cultural Psychology	(Same as: PSY 310.) The course considers what we mean by culture, and how taking culture into account affects our knowledge of basic psychology in areas like human development, the self-concept, gender expectations, as well as our understanding of mental illness. The courses focuses on both psychological and anthropological approaches to studying culture and the pros and cons of different approaches.	Wentz Science Center, Room 256	06/11/2019-07/30/2019 Tuesday 05:30PM - 07:30PM	3
SPN*101*71 (48806) Elementary Spanish I	Introduction to the basic structures of the Spanish language, with emphasis on listening and speaking.	Wentz Science Center, Room 040	06/10/2019-07/04/2019 Monday, Tuesday, Wednesday, Thursday 09:00AM - 11:30AM,	3
SPN*102*81 (48807) Elementary Spanish II	A continuation of Elementary Spanish I.	Wentz Science Center, Room 040	07/08/2019-08/01/2019 Monday, Tuesday, Wednesday, Thursday 09:00AM - 11:30AM	3
